PUBLIC LECTURE BY GOVERNOR HABIBA SARABI

US/ICOMOS, in partnership with the National Building Museum and in cooperation with the National Geographic Society, is pleased to announce a public lecture to be presented by Dr. Habiba Sarabi, Governor, Bamyan Province, Afghanistan.

In 2005, Dr. Sarabi was appointed governor of Afghanistan's Bamyan Province by President Hamid Karzai — the first woman to ever be a governor of any province in the country. She previously served in President Karzai's government as Minister of Women's Affairs and Minister of Culture and Education. As Governor, she has proposed a focus on tourism development as a source of income.

The “Cultural Landscape and Archaeological Remains of the Bamiyan Valley,” inscribed on the World Heritage List in 2003, is perhaps best known for two monumental statues of Buddha that were destroyed by the Taliban in 2001.

The public lecture is being presented in conjunction with the 11th US/ICOMOS International Symposium and the opening of the major international exhibition “Afghanistan: Hidden Treasures from the National Museum, Kabul” at the National Gallery of Art in Washington (opens May 25).

(continued on page 2 . . .)
Those attending the US/ICOMOS conference may reserve a seat for the lecture and attend a pre-lecture reception by marking the appropriate boxes on the registration form. Visit the US/ICOMOS website at [http://www.icomos.org/usicomos](http://www.icomos.org/usicomos) and follow the appropriate links. Those who do not wish to attend the conference/welcome reception may contact the National Building Museum directly or visit their website at [http://www.nbm.org](http://www.nbm.org) at click on EVENTS.

“Lost” Treasures Revealed in Photos

NEW WORLD HERITAGE TENTATIVE LIST FOR THE UNITED STATES

From the National Park Service’s International Quarterly Bulletin (Oct – Dec 2007)

After a long process that included public feedback and expert review, U.S. Secretary of the Interior Dirk Kempthorne announced the selection of 14 U.S. sites to be included on a new United States World Heritage Tentative List. The properties on the new list will now be eligible to be considered for nomination by the United States to the UNESCO World Heritage List, which recognizes the world’s most significant cultural and natural treasures.

From the US Department of the Interior Press Release (January 2008)

The new sites announced on the United States World Heritage Tentative List can be considered over the next 10 years for formal nomination by the United States as World Heritage Sites.

Nine of the 14 sites are cultural sites and one is a mixed natural and cultural site:

Civil Rights Movement Sites, Alabama
Dayton Aviation Sites, Ohio
Hopewell Ceremonial Earthworks, Ohio
Thomas Jefferson Buildings: Poplar Forest and Virginia State Capitol, Virginia
Mount Vernon, Virginia
Poverty Point State Historic Site, Louisiana
San Antonio Franciscan Missions, Texas
Serpent Mound, Ohio
Frank Lloyd Wright Buildings, Arizona, California, Illinois, New York, Oklahoma, Pennsylvania, and Wisconsin
Papahanaumokuakea National Monument, Hawaii (mixed natural and cultural site)

An additional 11 sites will eventually be considered for inclusion in the tentative list.

US Sites Currently on the World Heritage List

Mesa Verde National Park (1978)
Yellowstone National Park (1978)
Everglades National Park (1979)
Grand Canyon National Park (1979)
Independence Hall (1979)
Kluane / Wrangell-St Elias / Glacier Bay / Tatshenshini-Alsek (1979, 1992, 1994)
Redwood National and State Parks (1980)
Mammoth Cave National Park (1981)
Olympic National Park (1981)
Cahokia Mounds State Historic Site (1982)
La Fortaleza and San Juan National Historic Site in Puerto Rico (1983)
Great Smoky Mountains National Park (1983)
Statue of Liberty (1984)
Yosemite National Park (1984)
Chaco Culture (1987)
Hawaii Volcanoes National Park (1987)
Monticello and the University of Virginia in Charlottesville (1987)
Pueblo de Taos (1992)
Carlsbad Caverns National Park (1995)

US National Committee of the International Council on Monuments and Sites
The 2008 class of US/ICOMOS International Interns has been selected and is now in the process of obtaining visas, making travel plans, and packing. This year marks the 25th anniversary of the program, in which over 600 young preservation professionals and 70 countries have participated.

The 11th US/ICOMOS International Symposium, to be held May 28-31 in Washington, DC, coincides with the orientation for the interns. The final reception of the symposium (Saturday evening, May 31) also will be the 25th anniversary celebration. The following day the interns will travel to their host locations to begin their internships.

While US host organizations have regularly supported the program financially, in recent years US/ICOMOS has been successful in gaining monetary support from overseas host organizations, primarily in the form of stipends for the interns. This year, the host organizations in India, Ireland, Jamaica, Lithuania, and Romania are providing stipends for the interns; in addition, the host organizations in Belgium and Jamaica are providing free housing.

Working with the US Department of State and the National Park Service’s Archeology Program, US/ICOMOS will host an archaeologist from Afghanistan as part of a broader training/exchange program NPS has with the Afghanistan cultural heritage community.

The Presidio Says Farewell to Sannie Osborne

For 10 years, Sannie Osborne has hosted US/ICOMOS interns in the archaeology laboratory of the Presidio Trust. In April 2008 she is saying goodbye to the Presidio and returning to her former work with the Sacramento District of the US Army Corps of Engineers. Sannie has been a generous supporter of US/ICOMOS, hosting interns from Australia, Romania, Spain, the Philippines, and numerous other countries, and in gaining the support of the Presidio in hosting the 10th (2007) US/ICOMOS International Symposium, which was held at the Golden Gate Club on the Presidio grounds. US/ICOMOS extends our fondest farewell to Sannie and our gratitude for her years of support. We look forward to continuing our work with her (now) former staff, Eric Blind and Liz Clevenger.
CONSERVING ARCHITECTURAL HERITAGE IN THE CZECH REPUBLIC

Free public lecture presented by
Dr. Milos Drdacky and Dr. Zuzana Slizkova
at the Czech Center in New York City, on Thursday, 17 January 2008

By Kyle Normandin

US/ICOMOS, in conjunction with the Czech Center in New York City, sponsored a successful lecture entitled “Conserving Architectural Heritage in the Czech Republic.” The topic of the lecture focused on research developments on ongoing projects at the Academy of Sciences in Prague, Czech Republic. The lecture was held at the Czech Center on Thursday, 17 January 2008 and the organizer of event was US/ICOMOS member Kyle Normandin.

The venue of the Czech Center was graciously coordinated by Radka Krizek, director and coordinator at the Center. A special thank you goes to Wiss, Janney, Elstner Associates Inc. for their in-kind support of the reception that followed for attendees of the lecture. The lecture was presented free of charge.

The lecture on Czech Heritage was attended by approximately 35 historic preservation professionals, with attendance primarily from the New York Tri-State Area, including upstate New York, Massachusetts and Pennsylvania. The lecture was divided into two parts with Part I focusing on analysis and mechanical behavior of historic materials and Part II focusing on material conservation and consolidation of historic materials.

A range of research topics was presented through case studies projects which are currently underway involving heritage protection supported by the European Union including the European Centre of Excellence ARCCCHIP (Advanced Research Centre for Cultural Heritage interdisciplinary Projects). The lecturers, Dr. Milos Drdacky and Dr. Zuzana Slizkova, are directors of the Institute of Theoretical and Applied Mechanics established under the Academy of Sciences in the Czech Republic.

They reported on research and support through National Cultural Heritage Focus Areas under the Czech Construction Technological Platform which collaborate with the Academy of Science and working groups of Historic Cities and Towns. Case study projects included repair and replacement materials of traditional materials, testing and assessment of mechanical characteristics of historic mortar and timber, including consolidation treatments at the Karlstejn Castle, the St. Vitus Cathedral, and the Charles Bridge Tower.
Wednesday, May 28
Evening public lecture co-sponsored by the National Building Museum

Thursday, May 29
Plenary session, Grosvenor Auditorium, National Geographic Society
Evening. Young Professionals Mix and Mingle

Friday, May 30
Friday breakout sessions for continued panel discussions, Sumner School
Afternoon walking tours of foreign embassies along Embassy Row

Saturday, May 31
Annual meeting/closing session, Grosvenor Auditorium, National Geographic Society
Evening closing reception celebrating the 25th anniversary of the US/ICOMOS International Exchange Program
11th US/ICOMOS INTERNATIONAL SYMPOSIUM

US Participation in the Global Heritage Community

The 11th US/ICOMOS International Symposium will initiate a process for implementing the recommendations of the PreserveAmerica Summit’s “Participating in the Global Community” panel that will reinvigorate and enhance the U.S. role in international preservation. The Global Community panel made recommendations in four areas: community building, stewardship, leadership, and capacity-building.

In the call for papers issued last fall, US/ICOMOS sought abstracts that discuss innovative, successful programs and partnerships involving collaboration in international preservation within these four broad areas. US/ICOMOS was particularly interested in receiving abstracts from the international community that discuss the benefits received from collaboration with US preservationists, organizations, and agencies in addition to abstracts from US preservationists who have benefited from international collaboration in their work.

In addition to invited and selected papers to be presented at the symposium, US/ICOMOS is initiating a series of panel discussions amongst our members, each of which will result in draft recommendations, or action items, to be presented to the full symposium in Washington, DC. The symposium will also include break-out sessions for each panel that will allow conference attendees to discuss and finalize the draft recommendations into final reports that will be presented to the entire conference during the closing session.

Also, visit the PreserveAmerica website at http://www.preserveamerica.gov.

For more information on the PreserveAmerica Summit at http://www.preserveamerica.gov/summit.html and the Global Participation panel report (pdf file).

For more information on the 11th US/ICOMOS International Symposium, go to the US/ICOMOS website at http://www.icomos.org/usicomos

Detailed recommendations for each of the issue areas are presented in the following pages.
Issue Areas for Panel Discussions

Community Building (Heather MacIntosh, Chair)

- Support a national effort to attract foreign tourism to cultural heritage destinations within the United States.

- Facilitate the participation of US cities, historic districts, and cultural/natural landscapes in the World Heritage program through amendments to existing legislation [Preservation Act Amendments of 1980, provision 16 USC 470a-1(c)].

- Allow replacement applications to the U.S. World Heritage Tentative List as sites are nominated and forwarded to UNESCO for World Heritage consideration.

- Increase funding for and facilitate the participation of foreign professionals, academics, and policymakers in US preservation discourse and practice, and the participation of Americans in international discourse and practice, through NGO- or university-sponsored exchanges, government-sponsored tours and roundtables, etc.

- Promote public awareness of and enhance education about the significance of historic cultural sites, landscapes, and shared heritage in nations’ histories and development by (a) engaging local school boards, and Federal and State education agencies, in making heritage education and awareness part of the curriculum; and (b) enhancing the World Heritage in Young Hands Program.

Stewardship (Jonathan Poston, Chair)

- Require Federal agencies and all government-sponsored undertakings abroad (including foreign aid, disaster planning and recovery, government-issued contracts, trade agreements, etc) to review and consider heritage concerns in their international operations. For example, establish a mechanism (forum, proposed legislation, etc.) to enhance the policies of USAID, the Department of State, and other Federal agencies to a) create conditions for local engagement, so as to incorporate relevant values and traditions, and b) assess the impact of their work on cultural landscapes, sites, and traditions.

- Strengthen Department of Defense contingency planning and training to a) avoid, to the extent possible, destruction of cultural resources during periods of conflict and, b) incorporate heritage concerns in post-conflict reconstruction.

- Raise awareness and promote the integration of heritage concerns as part of the private sector’s international activities, including relief and assistance endeavors, technology and academic exchanges, and corporate investments abroad; and encourage American business to support preservation (and its interpretation) here and abroad. For example, require that portions of National Science Foundation grants for archaeological research overseas be used for conservation; encourage organizations involved in relief housing construction to incorporate traditional settlement patterns that rely on local building techniques and materials, etc.

- Leverage and encourage international development organizations (such as the World Bank, the International Monetary Fund, the Inter-American Development Bank, UNDP, and others) to embed heritage within their planning and development policies and frameworks.
Leadership (John Fowler, Chair)

- Reestablish a US Government presence and bolster its role in inter-governmental organizations dealing with heritage. For example:
  - Provide US Government support for the participation of US representatives in the governing bodies of ICCROM (International Centre for the Study of the Preservation and Restoration of Cultural Property) and ICOM (International Council of Museums); Cultural Heritage Steering Committee (CDPAT) of the Council of Europe.
  - Send official delegations to meetings of the Council of Europe, where the US holds a seat that is always empty.
  - Provide government support for the appointment of US representatives to offices and advisory committees of ICOMOS (International Council on Monuments and Sites);
  - Join the UN World Tourism Organization and provide leadership in promoting the tourism value of heritage preservation.
  - Increase funding and resources for Federal agencies and programs dealing with heritage issues abroad, such as the State Department’s Ambassador’s Fund, the NPS Office of International Affairs, etc.
  - Increase government support for American organizations addressing international heritage concerns, such as US/ICOMOS, AAM-ICOM, et al.
  - Strengthen the heritage preservation elements of US diplomacy, through the development of new initiatives and the enhancement of existing programs, such as the Ambassadors’ Fund and the International Visitors programs.

Capacity-Building (Kirk Cordell, Chair)

- Institute or enhance a forum or fora for sharing experiences and fostering an international dialogue about best practices among US agencies, organizations, institutions, and companies (public and private) engaged in preservation practices abroad, and their overseas partners (The Cooperative Conservation Conference might serve as a model).
  - Establish or enhance a network/clearinghouse (a) to gather and share data, information, and analysis; (b) to identify and coordinate gaps in knowledge and research; (c) to facilitate cooperative efforts; and (d) to assess international preservation practice effectiveness. (US/ICOMOS, the National Center for Preservation Technology and Training /NCPTT, and the Federal Preservation Institute might serve as conduits).
  - Expand support for existing programs that opportunities for international education, exchanges, and partnerships among public agencies, not-for-profits and NGOs, and private entities, such as Fulbright Fellowships, the US/ICOMOS exchange programs, ICCROM Fellowships, International Visitors programs, Ambassadors Fund, NPS twinning projects, and US-Italy exchange with USFS and NPS, technical and volunteer exchanges (USFS - Italy Heritage Excursions program).
Celebrating 25 Years of International Exchanges in Historic Preservation

Beginning in 1984 with a “one-time” exchange between the United States and the United Kingdom, the US/ICOMOS International Exchange Program has grown to involve more than 600 young preservation professionals and over 70 countries. In the intervening years, some of the early US/ICOMOS interns have advanced in their professional careers to work with the Getty Conservation Institute, the Aga Khan Trust for Culture, numerous private preservation architecture firms, and to serve on the US/ICOMOS Board of Trustees. It is fair to say that former US/ICOMOS interns can now be found in virtually all corners of the US and international preservation communities.

Initially, the US/ICOMOS International Exchange Program concentrated on exchanges with preservation organizations in Western Europe. The program grew to include internships in countries in other parts of Europe and also in Africa, Asia, South America and the Caribbean. In fact, internships have been conducted in countries that did not even exist independently when the program first began. Internships were conducted in the (former) Soviet Union then subsequently in Russia, in Yugoslavia then subsequently in Croatia.

On the US side, the National Park Service’s HABS/HAER/HALS division (now NPS Heritage Documentation Services) formed the backbone of internship opportunities, hosting numerous interns from overseas each year on their many and varied documentation projects across the country. As word of the success of the program spread within the National Park Service, other divisions and units hosted international interns as well, including the NPS National Capital Region, the National Center for Preservation Technology & Training, and a number of individual park units, including Mesa Verde National Park in Colorado, Channel Islands National Park in California, and others.

In time, private non-profit preservation organizations joined the program. The Historic Charleston Foundation in South Carolina and Cornerstones Community Partnerships in New Mexico both have hosted US/ICOMOS international interns for over a decade. The Presidio Trust, a quasi-governmental unit of the National Park Service, has also hosted interns for the past ten years.
Numerous host organizations have come and gone over the course of the program, with changes in funding, staff, and organizational priorities being the primary reasons. Organizations overseas that have joined the program in recent years increasingly are providing stipends to the interns, greatly enhancing the ability of US/ICOMOS to spread existing funding further and offer more and more varied internship opportunities.

Of particular note are the overseas internships that were initiated by former US/ICOMOS Interns who recognized the benefits of their experience and the program in general. Divay Gupta, former US/ICOMOS intern with the Historic Charleston Foundation, returned to India and began hosting US/ICOMOS interns with his organization INTACH (Indian National Trust for Art & Cultural Heritage). Emmeline Henderson, former US/ICOMOS intern with the General Services Administration’s Center for Historic Buildings in Washington, returned to Ireland, became Secretary of ICOMOS Ireland, and identified several Irish preservation organizations and agencies that have begun hosting US/ICOMOS interns.

Charleston to Ghana -
Long-term Effects of International Exchanges

In 1995, Nicholas Afadzi, an instructor at the Department of Architecture, University of Science & Technology, Kumasi, Ghana, was selected as a 1995 US/ICOMOS International Intern and placed with the Historic Charleston Foundation in South Carolina. A long-term relationship between US/ICOMOS and Ghana developed from that initial exchange.

1995
US/ICOMOS Intern from Ghana with the Historic Charleston Foundation

Nicholas Afadzi, the 1995 US/ICOMOS International Intern with the Historic Charleston Foundation, worked on several projects in Charleston. His internship involved preparing measured drawings and photographic documentation of the Old Slave Mart, the Old Bethel Methodist Church, and an external crack recording of the Old Powder Magazine. He also had the opportunity to observe other aspects of the Foundation’s work, including sitting in on Board meetings with the Executive Director
and city officials to discuss tourism proposals for the Old Slave Mart; attending lectures on the local architecture, and attending meetings of the City's Board of Architectural Review. The internship culminated with an exhibition of his work by the Foundation at the Avery Research Center in Charleston.

During the same period, Gina Haney, now a US/ICOMOS Board member, was a (non-US/ICOMOS) intern in Charleston and met Mr. Afadzi, who encouraged her to get involved with preservation projects in Ghana by joining the US/ICOMOS International Exchange Program.

1996
US-Ghana Bilateral Exchange

In 1996, Jeffery Ussher Andoh (architect with the firm of D.S. Kpodo-Tay in Ghana) was awarded a US/ICOMOS Internship with the National Park Service’s Historic American Engineering Record (HAER). His internship involved assisting with an ongoing study of America’s modern blast furnace history.

Gina Haney, who at this time was completing a Masters degree in architectural history at the University of Virginia, was awarded a US/ICOMOS Internship in Ghana. Her internship involved documenting, preparing measured drawings for, and compiling an historic structures report for the former Government House (built c. 1830 by British officer Frank Swanzy in Cape Coast). The project was sponsored by the Municipality of Cape Coast and the Ghana Museums Board, with financial support for the internship provided by the National Center for Preservation Technology and Training (NCPTT) in the U.S.

1996 - 2000
Central Region Natural Resource and Historic Preservation Project, Ghana (US/ICOMOS, Conservation International, ICOMOS Ghana)

Cape Coast had been undergoing renewed development due to increases both in population and in the number of tourists. In 1996, US/ICOMOS joined with Conservation International and ICOMOS Ghana for a multi-year project funded by the US Agency for International Development focused in large part on developing tourism potential in the Cape Coast region. Under this grant, three of the most
significant castles and forts (all World Heritage sites) along the former Gold Coast were restored; museum and interpretive programs were established; a protected, national rainforest park (Kakum National Park) was created; local communities received training assistance to develop alternative agricultural and business ventures; and tourism literature was developed.

1998 - 2000
Consolidation Phase and Design & Planning Workshop in Ghana

Upon completing her Master’s degree and based on her previous internship in Ghana, Gina Haney was named project manager for the historic preservation component of the Consolidation Phase of the Cape Coast project. This work included a design and planning workshop co-sponsored by Conservation International and the Ghana Heritage Conservation Trust and funded by the U.S. Agency for International Development, for conservation and tourism development for Cape Coast.

The workshop brought together, from Ghana and elsewhere, experts in the fields of heritage conservation to draft a conservation and tourism development plan for Cape Coast. The workshop participants’ recommendations focused on specific areas of concern, including definition of the historic district, suggestions for protective legislation, suggestions for waterfront development, and priority tourist services that were needed, among others. The results of this workshop are summarized in a booklet “Conservation and Tourism Development Plan for Cape Coast” published by US/ICOMOS in 2000.

2006
US/ICOMOS Evaluation Mission and Internship in Ghana

In 2006, US/ICOMOS received a grant from the Samuel H. Kress Foundation to conduct an evaluation mission to Ghana to determine the sustainability of the preservation accomplishments that resulted from the initial multi-year project. Gina Haney (by this time a US/ICOMOS Trustee) returned to Ghana, accompanied by Theresa Coolahan, a US/ICOMOS Intern from the United States. In addition to the evaluation mission, a primary goal of the trip was to make arrangements for another U.S. internship in Ghana.
Ms. Haney and Ms. Coolahan were successful in identifying a project and obtaining local input on a potential summer internship in Ghana for the 2007 season. This internship would build on the previous efforts and successes in Cape Coast, such as the World Heritage sites and Government House, by focusing on Gothic House.

2007
US/ICOMOS Internship focusing on Gothic House in Cape Coast, Ghana

Kaci Kepferle of the United States was selected as the 2007 US/ICOMOS Intern to Ghana. Ms. Kepferle’s internship focused on restoration efforts at Gothic House, the headquarters of the Oguaa Traditional Council. Built by wealthy trader James Dawson around 1815, Gothic House is one of Cape Coast's most important architectural properties. The property was owned for many years by Jacob Wilson Sey, who founded the Aborigines Rights Protection Agency in the 1890s, before turning it over to the Ghanaian government shortly after Ghana achieved independence.

Kaci Kepferle spent three months making a series of measured drawings of the property to provide the basis for planned restoration efforts. During the course of her internship, it was learned that the U.S. State Department's Ambassador's Fund for Cultural Preservation awarded $50,000 to the U.S. Embassy in Ghana to assist in the restoration efforts (see article on the Ambassador’s Fund award).

Long-Term Impacts

One of the primary reasons for the long-term success of the US/ICOMOS International Exchange Program is the nature of the intern projects themselves. While the internships are designed to provide training for each intern, the work they are assigned involve real-life preservation projects, often in the earliest stages of planning and development. Host organizations, such as the Historic Charleston Foundation, depend on US/ICOMOS Interns to perform at the highest professional level, as the final products of US/ICOMOS Internships often form the basis for preservation planning for particular sites and properties.

U.S. Embassy in Ghana Receives $50,000 Award from the Ambassador’s Fund for Cultural Preservation

The U.S. Embassy has awarded this grant to the Oguaa Traditional Council (OTC) to restore and preserve the historic Gothic House in Cape Coast.

Read more here...
In the case of Ghana, from an initial internship in 1995, US/ICOMOS has been able, with substantial support from various sources, to continue to have a positive long-term impact on the preservation of historic resources in Ghana.

Numerous other examples can be found throughout the US/ICOMOS International Exchange Program over its many years and many internships.

Several years ago, the National Park Service published *America’s National Park Roads and Parkways: Drawings from the Historic American Engineering Record*. This large-format book brings together 331 measured and interpretive drawings commissioned by HAER to illustrate the physical characteristics, design strategies, construction practices, and visitor experiences of roads in national parks from Acadia to Zion and parkways from the Blue Ridge to the Natchez Trace. Over the years, more than 30 US/ICOMOS International Interns have assisted NPS with documentation of America’s National Park Roads and Roadways, and numerous other interns have assisted with other NPS projects.

In the US Southwest, ceremonies at the mission of Nuestra Señora de la Limpia Concepción celebrated the completion of the extensive Socorro Mission Preservation Project in 2005, a major long-term project (1998-2005) of Cornerstones Community Partnerships in Santa Fe, New Mexico. A significant outcome of the project was the amount of new archaeological, historical and architectural research conducted in collaboration with the Sociology Anthropology Department of the University of Texas at El Paso (UTEP) and the El Paso Archaeological Society (EPAS). US/ICOMOS International Intern Jacobo Herdoiza, an Ecuadorian architect, prepared a series of unprecedented architectural drawings based on research originally conducted by Jesuit archivist Ernest J. Burrus. Herdoiza’s drawings have been included in an informative brochure authored by Cornerstones’ Jean Fulton, Socorro Mission Preservation Assistant Project Coordinator. In addition to Ecuador, the project has hosted ICOMOS interns from South Africa, Ghana, Mexico, and Australia.

The US/ICOMOS International Exchange Program looks forward to the next 25 years providing preservation professionals in the early stages of their careers with similar rewarding projects across the US and around the globe!

GET INVOLVED WITH ICOMOS INTERNATIONAL SCIENTIFIC COMMITTEES (ISCs)

(Open only to international members of US/ICOMOS)

At the 2005 General Assembly in China, ICOMOS ratified the Eger-Xi’an Principles, which adopt a new membership structure for the ISCs, as follows:

Expert Member Status

1. ISCs must accept as Expert Members all ICOMOS members who meet the criteria adopted by each ISC, regardless of National Committee affiliation.
2. While this is not a certification process, it does constitute international recognition by ICOMOS of our members’ particular expertise.

To maintain Expert Member status, active participation in Committee research and project initiatives is required, as is periodic attendance at ISC meetings and conferences, which are held in various places throughout the world.

Entry-Level Membership

1. The Principles also provide for an entry-level membership for those whose experience is not yet sufficient to qualify as experts but who wish to develop a particular expertise.
2. Through mentoring and active participation in its activities, each ISC will assist entry-level members achieve expert status.

Each ISC will make its own determination regarding the level of membership for which the applicant is accepted. Members can appeal ISC decisions to the ICOMOS Scientific Council.

Application Procedures

In order to coordinate the membership of US/ICOMOS and the ISCs, International members should

1. Mark the appropriate committee(s) on the membership form,
2. Submit the form with your annual International membership dues to US/ICOMOS, and
3. Enclose two (2) copies of your curriculum vitae or resume for each ISC you select. (Please mark the ISC name for which the CV is destined at the top of the first page of the CV.)

US/ICOMOS will keep one copy of your CV in our files and will send one to the chairs of the respective ISCs.

Support World Heritage Preservation—Join US/ICOMOS!

US/ICOMOS guides and promotes activities through an extensive membership network of preservation professionals, institutions, and organizations, including specialized scientific committees. US/ICOMOS membership is open to all individuals who care about preserving our world's cultural heritage. Individuals and institutions may join at different levels to receive different benefits. Membership categories and benefits are listed below. US/ICOMOS is a 501(c)(3) not-for-profit organization, so donations to US/ICOMOS are tax-deductible. Membership dues account for less than five percent of the operating budget. To achieve its mission, US/ICOMOS depends on the generous philanthropy of foundations, members, and friends.

Enroll me as an individual member in the following category:

- **International** ($135) - a portion of International membership dues goes to the ICOMOS Secretariat in Paris, which sends out the ICOMOS Card, good for free or discounted entry to heritage sites around the world
- **National Affiliate** ($80)
- **Student** ($30)

For non-profit organizations, educational institutions, government agencies, private commercial firms, and other institutions, Institutional membership is a cost-effective way to support international preservation and reward the professional commitment of your staff.

Enroll my organization/institution/agency as an Institutional member at the following level:

- **Institutional** ($425) - designate up to 4 staff members as International members)
- **Supporting** ($850) - designate up to 8

Mail your completed membership enrollment form with payment to:

**US/ICOMOS**

401 F Street, NW, Suite 331
Washington, DC 20001

If paying by credit card, you may fax the form to 202-842-1861.
